## iOS To iOS Password Transfer

# Passdiary

Store and manage all your passwords in a single wallet.

## What is iOS to iOS Password transfer?

**iOS to iOS transfer is a quick and easy way to transfer your passwords from one device to other securely.**

### Important Prerequisites :

1. To Use 'Transfer iOS to iOS' feature, Please make sure both iOS devices have the PassDiary version 1.7 or higher installed successfully.
2. Make sure both devices are connected to same Wifi network.
3. During transfer process, please make sure that you do not leave the application window from any of the devices, failing to do so will interrupt the complete process and devices get disconnected.
4. At any time while using this feature to transfer the file, if your devices gets disconnected due to any reasons, Please re-connect the devices and try again from step no 1 as given below.
